

DIEGO ACERO ARGÜELLES

Senior Software Engineer (Full-Stack) · Madrid, Spain (CET) · Remote

diegoaceroarguelles@gmail.com · www.linkedin.com/in/diego-acero-arguelles · [github](#)

Full-stack product engineer with 5+ years shipping Ruby on Rails products at scale in fast-moving scale-ups. I'm an owner, not a renter: I take a feature from spec to production, make the calls it needs, and balance craftsmanship with the velocity a fast roadmap demands. I care about the end product and the experience people actually get, and I'm proud of what I ship.

I also build closely with AI. It's core to how I develop and design, from Claude Code with MCP servers in my daily workflow to LLM-powered automation I've built on the side. I'm drawn to teams pushing generative AI into real products at scale.

EXPERIENCE

Senior Product Engineer (Full-Stack), SeQura

Sep 2022 - Present · Madrid · Fintech scale-up, remote

- Founding engineer on a new product line, owning the full stack (Ruby on Rails + React/TypeScript) from spec to production and making the product and technical calls along the way.
- Split a legacy Rails monolith into scalable, service-oriented modules while keeping high reliability across millions of transactions.
- Shipped features fast without dropping craftsmanship, partnering with product and design on interfaces people use every day.

Software Engineer (Complex Systems), IoBuilders

Sep 2020 - Sep 2022 · Madrid · Deep-tech / blockchain

- Built a 0-to-1 platform for tokenized assets (Spain's first regulated blockchain fund), solving problems where data integrity and reliability were non-negotiable.
- Designed APIs and background workers bridging complex protocols and the web interfaces on top

of them.

- Ramped on Solidity and smart-contract development in weeks to unblock the business.

Software Engineer, Lastminute.com

Sep 2019 - Sep 2020 · Madrid · Travel / high-traffic web

- Built automated page-generation engines serving millions of users, focused on performance and scalability.

SELECTED PROJECTS

- **The Scribe: full-stack app, shipped solo end-to-end** · github.com/Acero-AD/TheScribe Built on the latest **Ruby on Rails 8.1** + **PostgreSQL 17**, with a React front end, passwordless magic-link auth, and web push. Taken from idea to a working product on my own, spec-driven, with an AI-native workflow (Claude Code, Cursor) and CI on GitHub Actions.
- **Lensy: Moder Optics POS** · Built using Ruby on Rails and React focused on GDPR compliance and making the POS experience simpler and cleaner to what Optics are used to.
- **LLM-powered automation**: an n8n pipeline that monitors AI YouTube channels, transcribes and summarizes them with Claude, and ships a daily email digest. Hands-on with putting generative AI into a working workflow.
- **High-performance Ruby data processing**: a script that processes a ~145 MB / ~12M-line file with byte-level parsing, bitmask matching, and Ractor-based parallelization. Ruby down to the byte.
- **Go and Rust projects**: an error-reporting SDK and API in Go, and a 2D game engine written from scratch in Rust on `wgpu` + `winit`.

TECHNICAL SKILLS

- **Backend**: Ruby on Rails (latest), Ruby, PostgreSQL, Redis, API design, background workers, system design
- **Frontend**: React, TypeScript, Tailwind CSS, modern CSS
- **Generative AI**: LLM-powered workflows and automation; AI-augmented development with Claude Code, MCP servers, Cursor and **Spec Driven development** using OpenSpec
- **Also**: Go, Rust, AWS, CI/CD (GitHub Actions), Git
- **Strengths**: end-to-end ownership, shipping at pace without dropping quality, performance

optimization, user-focused product sense

LEADERSHIP

Head of Under-18 Teams, MAD Rugby Boadilla (2018-2020). Managed 100+ players. A coaching background built on "team over ego" and helping other people get better.

EDUCATION

- **Double Technical Degree in Web & Multiplatform Development**, I.E.S. Clara del Rey (2020)
- **Master's in Secondary Education Teacher Training**, Universidad Francisco de Vitoria (2018)
- **Bachelor's in Sport Science**, Universidad Politécnica de Madrid (2016)

Languages: Spanish (native), English (professional).
